

HOW TO IDENTIFY YOUR FRIDGE OR FREEZER SEAL

Fridge Seals
Direct [.co.uk](https://www.fridge-seals-direct.co.uk)

STEP 1 Cut a cross section of the seal from the top side of the door. This can be replaced until a seal profile seal is identified. Use a sharp implement as some fridge freezer seals have a magnetic strip.

Identify the profile by using our door seal sample kit or our website at www.fridgesealsdirect.co.uk

Dart

Dart

Flap

Lip

Block

If you are unable to find a match or are unsure of which profile you have, send us a clear photo of the cross section of the seal via whatsapp or email.
